Dear Craig,

I wanted to commend your company on the work performed in our house from September to December of 2007.

The house had extensive work completed due to water infiltration. In addition to remediation for mold, your crew installed windows and replaced exterior siding; repaired joists; reconstructed trusses; reinstalled an improperly installed French door; and repaired poorly finished dry wall.

Justin Emmons was very effective at managing the crew to ensure efficiency and thoroughness. Crewmembers delivered quality work under his supervision. They were consistently courteous and diligent with regard to cleaning. Having working crews in the house for months was not a burden mainly because of the professionalism displayed. Equally notable is the high level of craftsmanship evident in the finish work.

For the first time in seven years, I no longer have to stuff towels under doors and windows during a driving rain. It is such a relief to know that the problems have been fixed correctly and that the house does not harbor mold. I would certainly recommend your company for mold remediation and general contracting needs.

Thank you for providing such excellent service and skilled labor.

Sincerely,

Elizabeth Palmese
