

12/13/2007

Craig,

I wanted to take a moment to thank you and your entire staff at Advanced Mold Diagnostics again for the terrific job you did at the Level 3 Communications site in Norristown, PA. Although I selected your company from an Internet search, you and Deb both made me feel like a long-term, valued customer from the very first conversations that we had. In addition, you went above and beyond expectations by being flexible and understanding to our client's needs with this project. You and your staff have been timely with appointments and documents, have always been available to answer questions and address concerns, and have been nothing but professional in all of your actions. The work at the site was completed quickly, and the site passed post-remediation testing for both the original service area and the additional change-order area.

I cannot recommend you enough to any individual, family, or company that is in need of Mold Remediation services or any other service that your company provides.

Thanks again for helping me complete a difficult project and I look forward to doing business with you again in the future.

Sincerely,

**Matthew H. Elias**
